CARRIER OBJECTIVE

To work for an organization which provides me the opportunity to improve my skills and knowledge to grow along with the organization objective.

PROJECTS

Enhanced Object Detection Methods for Automatic Inspection

Built a deep learning-based system for automated manhole detection using CNN-BiLSTM and YOLO. Designed a Tkinter GUI for real-time visualization and dataset handling. Achieved 95 percentage+ accuracy with reduced false positives, supporting smart city infrastructure monitoring.

Maya AI-Powered Conversational Chatbot

Developed an AI-powered chatbot using Google Gemini API for smart and interactive conversations. Integrated features like file upload, emoji support, and image/link generation with a user-friendly web interface. Enhanced responsiveness and accuracy for real-time query handling.

Medical Cyber Security AI-Based Threat Prediction System

Developed an AI-based system to analyze healthcare cyber security reports using Natural Language Processing (NLP). The system automatically identifies the type of cyber threat, its severity, and suggests suitable defense mechanisms. It reduces manual effort and helps hospitals respond to cyber attacks quickly and accurately.
